Welcome to our Practice:

At St Pete Family Care, above all else, we are committed to the health and well-being of you and your family. We recognize that seeing a new physician may be stressful. We are committed to providing compassionate, courteous care to you and your family, being respectful of your time, respecting your privacy, providing you with up-to-date medical information and working with your insurance carrier to minimize any possible paperwork “hassles”.

Our practice provides total body healthcare. The practice is also a teaching facility for Family Medicine physicians, following the guidelines of the American Osteopathic Association. In this way, we can provide prompt, attentive service, and more individualized attention. We focus on preventive care and treatment, and can provide a wide array of primary care services with some on-site diagnostic testing and in-office procedures for your convenience.

We offer a broad range of services, including Physicals (employment, school and sports), Well Visits, including Well-Woman Exams, EKGs, Minor surgical procedures and laceration repairs as well as sick visits. In most cases, we are able to offer same day appointments for your convenience. Our focus is on Preventative Medicine.

The staff and physicians at St Pete Family Care would like to welcome you and thank you for choosing our practice. On behalf of our entire staff we look forward to seeing you and we will do everything we can to earn and keep the trust you have placed in us.

Stacy Chase, D.O.
